According to the Company's dividend policy, payment of dividend is set at 20% of the par value per share. In 2012, the Company gained net profit at the amount of Baht 968,897,979 it was then considered appropriately to pay the 2012 dividend at Baht 1.25 per share to shareowners on the record date to be entitled for dividend reception which has been set on May 2, 2013. The date to conclude a list of shareowners via the suspension of share transfer registration, in compliance with the Section No. 225 of the Securities & Exchange Act, was also set on May 3, 2013. Consequently, the total amount of entitled shares is 290,633,730, while the amount of dividend to be paid is Baht 363,292,162.50 making the pay-out ratio reaching 0.37 times or equivalent to 125% of par value per share. The payment of dividend was set on May 21, 2013.

Followings are details of dividend payment :

5. Payout ratio	times	0.37	0.46	80.43

The meeting were requested to consider for approval on such dividend payment.

For this agenda, there were questions from a shareowner:

Mr. Krailuek Pothiapiyarnwisuth, shareowner asked;

: With reference to the Company's continual policy on dividend payment at Baht 0.20 per share or at 20% of PAR value but the company so far gain a profit much more than that, he therefore was curious to know the criteria on how the Board of Director consider for dividend payment based on how much percentage of net profit and the payout ratio.

Explained by the President and Executive Chairman

: The Company has the policy to pay dividend to shareowner at 0.20 Baht/share which is equivalent to 20% of the PAR value. It however depends mainly on the overall operational results and economic situation. In the past years, the Company constantly paid the dividend in compliance with this policy and considered it as one method of the our risk management which we must adhere to with confidence. The company then considers it as a practical and appropriate policy because doing business nowadays is volatile. If we set too high benefit standard and unable to achieve, we might lose credibility among shareowners. Therefore it would be better for both the Company and the shareowners if we set a low standard policy at first and improve it gradually later. One of our principals of thought that's always in practice is "Always doing beyond our promise".

Mr. Krailuek Pothiapiyarnwisuth, shareowner additionally asked;

: This year, the company has increased the dividend payment from Baht 1.10 per share to Baht 1.25 per share (increased 13.64%) and expected a satisfaction from the shareowners. The shareowners however are afraid that the company would be unable to achieve the target and would make the shareowner unsatisfying. The more or less dividend payment is actually not an issue. It is a normal practice for the company to pay less dividend when having less net profit. Hence the company should set up a certain standard for dividend payment such as at 10% or 20% of the Company Net Profit so that the shareowner has no need to predict the dividend rate each year. Furthermore the company enable to remark in case that the company has an intention to have such a large investment or having other necessary projects to invest which can be considered case by case as appropriated. This is a normal practice as same as other companies presently doing and would be a beneficial for both the shareowners and the company as well as showing more international practice.

Explained by the President and Executive Chairman

- : The Company will take Mr. Krailuek's advice for consideration. However, the Company normally has policy to pay dividend to shareowners at 0.20 Baht per share which is equivalent to 20% of the PAR value which both contribute benefit to the shareowners while enhancing the growing potential to the Company. Usually a change in something must effect to others to be changed as well. Therefore it would be better if we remain unchanged in something while it is also acceptable by the shareowner. The dividend payment in more or less amount is not an issue.

Mr. Methee Unadirekkul, a proxy from Thai Investor Association asked;

- : If the company can pay a dividend from the company profit after 30% corporate tax while the shareowner can also be entitled for 30% tax refund, it therefore will be the best mutual benefit for both parties except the Revenue Department who might be disadvantaged.

Explained by Executive Director & Vice President : Accounting, Finance and Information Technology Division

- : The Company has dividend payment policy in compliance with the company business performance and the tax base to be paid for each year. In fact, the company must pay dividend from the net profit after tax based on the tax base for that certain year. In 2012, the company paid the corporate tax at 23%, therefore the dividend should be paid from the net profit after corporate tax paid based on the 23% tax base.

Explained by the President and Executive Chairman

- : These related questions. However this is a sensitive issue and need to be checked in various factors. It therefore cannot be concluded in the meeting. The company will then bring back this issue to the company, review and reconsider it. We would also request the Executive Director and the Vice President: Accounting, Finance and Information Technology to verify details with the Auditor once again. However, benefit of shareowners shall be our most consideration.

The President and Executive Chairman gave a chance for additional inquiry to shareowners but none was raised.

After due consideration, the meeting unanimously approved such payment as proposed by the President and Executive Chairman.

4.2 Statutory Reserve

The President and Executive Chairman informed that according to the Company's Articles of Association: Chapter 6 on Dividend and Reserve Fund of which the Article No. 58 says "The Company shall allot at least one-twentieth (1/20) of its annual net profit deducted by the accumulated loss brought forward to a reserve fund until such reserve fund attains the amount of one-tenth (1/10) of the Company's registered capital." As of December 31, 2012, the Company's registered capital amounted Baht 500,000,000 with paid-up capital Baht 290,633,730 and statutory reserve Baht 50,000,000 representing 10% of the registered capital. The Board of Directors thus considered appropriate not to increase

the amount of statutory reserve as it has already been completely reserved in compliance with the Company's Articles of Association. Attendants of the meeting were then requested to consider for approval.

Agenda 7 To consider other matter (if any).

For this agenda, there were questions from shareowners:

Mr. Krailuek Pothiapiyarnwisuth, shareowner asked;

- : 1) Regarding to the leap growth of the modern trade business for the past five years, the Company need or not need to decrease or increase the gross profit given to the modern trade and what measure the company use to solve the problem.
- 2) Regarding to the continual investment in the joint-ventures and subsidiary companies including expanding business line into a real estate industry or car rental business, the shareowner would like to know what direction the Company will take for the future investment in terms of major business type, investment ratio and potential risk prevention policy. For instance, the shareowner needed an explanation on the company viewpoint in investing 25% in Issara United Co., Ltd.
- 3) The shareowner would like to know the top-three companies invested by the Company which suffered a loss in 2012 and how the Company coped with this issue.

Explained by the President and Executive Chairman

- : 1) The gross profit shared to the modern trade business is similar the normal amount. Payment to each establishment is now considered an appropriate amount and no increased payment has been practiced. At the same time, the Company has already set up a negotiation with some of these establishments which requested more GP. However the key factor that make less or more profit to the Company is price competition which much affects to our profit decrease. To this we have to maneuver it in order to face the least impacts.
- 2) There are several factors used by the Company to support the consideration on investment in other companies, for instance, by a negotiation, or considering the potential risk. If it's too risky, we might not invest. Even though it's not risky but generating a low business growth rate, the Company may consider not to take part either. Therefore the ratio and criteria for considering investment would depend on agreement of each joint investor included their capabilities. There are various reasons for making a decision on any joint venture investment that needs much experience and

fine discretion, the Company therefore considered to select the Charn Issara Group who has the most experience in real estate business to be our business partner when we expanded business into the Real Estate industry. We then negotiated and agreed to invest 25% in the project with the Issara United Co., Ltd. which is considered an appropriate ratio.

- 3) The joint venture company which suffered the most loss is Pan Asia Footwear Plc. in which the Company's President and Executive Chairman had already taken part in helping to resolve and improve its situation. For other joint venture companies, we expect no problem or significant issue incurred.

Mr. Methee Unadirekkul, a proxy from Thai Investor Association asked;

- : At present, the company has whether invested in any countries of AEC or not and at what stage. Is there any sales representative office being established or only exporting products for distribution in AEC ?

Explained by the President

- : This matter should not be explained in details at this moment as it is one of our business strategy. Normally several business strategies are a sensitive matter that is improper to mention in the meeting. The Company however has well prepared on this matter so that the shareowners can be rest assured.
